Yangon, Myanmar | Willing to relocate to Germany

Subject: Application for System Engineer FinOps

Dear Hiring Team,

I am writing to express my strong interest in the System Engineer FinOps position. With 8+ years of enterprise IT experience specializing in Microsoft Azure, Kubernetes/AKS, DevOps, and FinOps, I am confident in my ability to contribute to your cloud operations and cost-efficiency goals. I am fully committed to relocating to Germany and am excited about the opportunity to bring my skills to your team.

In my current role as Assistant Manager, Cloud & Infrastructure Engineer at AIA Myanmar, I have delivered measurable FinOps results, including \$30K in cloud savings (2024), \$33.2K (2025), and a \$40K target achieved (2026) and totaling \$103.2K in cloud cost optimization. These results were achieved through Azure resource optimization, cost analysis, reporting, and close collaboration with technical and business stakeholders. My FinOps certifications (FinOps Certified Engineer, Practitioner, and FOCUS Analyst) further strengthen my ability to drive cloud financial management.

Beyond FinOps, I bring hands-on expertise in:

- Azure & AKS: Public/private cluster migration, architecture reviews, and production operations.
- DevOps & Automation: GitHub Actions, Azure DevOps Pipelines, CI/CD, and deployment automation.
- Reliability & Security: Disaster recovery, DR drills, incident response, IAM, and vulnerability management.
- Enterprise Applications: Supported mission-critical insurance platforms including AIA+, SuperApp, iPos, iAgent, CMS, COAST, IL, ETL, and CRM.

I thrive in cross-functional environments, having led cloud migrations, infrastructure modernization, and architecture reviews while maintaining stable operations for business-critical systems. I am eager to bring this experience to your team and contribute to your cloud infrastructure and FinOps initiatives in Germany.

I am fluent in English and actively learning German to integrate smoothly into the local work environment. I am ready to relocate promptly and am open to discussing visa sponsorship and onboarding timelines.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills in Azure, AKS, DevOps, and FinOps can add value to your team.

Sincerely,
Aung Thu Hein Oo
